

ECU Fault Code Chart Addendum

The following fault codes were added beyond the original series of fault codes defined by the original equipment manufacturer.

Fault Code	Problem	Possible Causes	Solution
69	Flashing beacon output fault	Malfunctioning beacon OR wire shorted to ground	Troubleshoot beacon OR inspect wire connection
70	Motor controller enable output fault (A8 or U6 terminal 1)	Malfunctioning motor controller OR wire shorted to ground	Troubleshoot motor controller OR inspect wire connection
71	Spare output (C10) fault	Connection C10 shorted to ground	Inspect connection C10
72	Horn output fault	Malfunctioning horn or wire shorted to ground	Troubleshoot horn OR inspect wire connection
