

Part # 030849-000

Proportional Controller Conversion

Replaces Part # 066544-000 Controller with Part # 066786-000

Wires from controller "pigtail"

Control cable and switch wires removed from old controller

Wires on left side come from "pigtail" on controller
Wires on right side come from control cable or switches as indicated

1. Remove old controller and install new controller in control box
2. Cut 12 pin plug off of "pigtail", leaving wires as long as possible.
3. Cut terminals off control cable and switch wires removed from old controller.
4. Strip each wire and insert it into proper terminal on terminal strip P/N 068818-000, as shown on drawing above.
5. Close control box and perform full function check on new controller including checking elevated drive speed at 20 feet in 18-22 seconds.
